

Enterprise Class Reporting Solutions for Any Voice Network

User-Managed Application or Cloud Based Service

CommView Plus[®] and CommView Cloud[®] from @Comm Corporation help shine a light on your voice network and show how it's being used.

The reporting solutions in @Comm's CommView family have been developed for daily use and help businesses gain insight by presenting valuable voice network usage data in a manner that is accessible, intelligible, and actionable.

@Comm has a 35+ year history of providing business managers with the vision needed to gain operational efficiencies and increase performance across all departments.

Benefits include:

- **Improve Team Productivity**
- **Enhance Voice Network Security**
- **Manage Telecom Costs**

Important business elements such as: customer service flow, cost control, and potential voice network fraud can be more closely detected, measured, and managed.

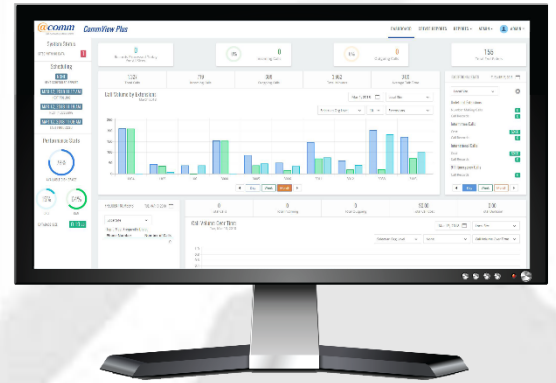

Intuitive Design

The user experience remains a cornerstone of our CommView Plus and CommView Cloud solutions. This is highlighted by a browser-based interface, with efficient navigation designed to present usage data cleanly and crisply. Our upgraded interface also helps with the overall organization of data, keeping projects streamlined and daily report construction on schedule. CommView Plus and CommView Cloud are constructed for everyday use by IT/Telecom managers and business managers alike. Within moments of logging in, useful reports can be generated with a few clicks of the mouse, providing management and staff a better understanding and visualization of call-flow data, staff performance, and possible security issues.

An enhanced dashboard delivers a single-screen informative display to complement powerful on-demand & scheduled reporting capabilities. Key metrics may be analyzed and interpreted for action or for deeper investigation.

Users will benefit from:

- *Report Automation*
- *On-Screen Drill Down*
- *Customizable Report Templates*
- *Ability to Integrate Wireless with Wireline Usage*

Choose a one-time capital expenditure (CommView Plus) or enjoy the low entry cost and flexibility of a cloud service (CommView Cloud) – the choice is yours. In short, @Comm helps businesses better manage their voice networks and the people who use them!

Compliance Assurance

@Comm's CommView Plus and CommView Cloud provide seamless integration with virtually all PBX and IP-PBX manufacturers. Ideal for both single site deployments as well as complex, multi-branded networks - CommView Plus and CommView Cloud are affordable, compliance-tested, and easy-to-use. To ensure ongoing compatibility in our evolving industry, @Comm actively participates in developer programs from all major manufacturers.

Why @Comm Corporation?

@Comm Corporation has been singularly focused on designing, selling, and servicing full-featured, cost-effective call accounting and reporting solutions for more than 35 years. We have a rich history of backing our solutions with unparalleled support and provide training geared to helping users of our solutions maximize their return on investment.
